Profile

An aspiring and ambitious person. Great at problem solving and learning quick, as well as delivering great results. I am an adventurer and a happy spirit. Love to work in teams, learn new things and bring experience and knowledge to the table. I have been around computers since I was born and have been learning and working in a lot of computer science areas. I have experience in game development, web design and development, cyber security, image and video editing,.. Have experience with object-oriented programming (C#, Java, C++) and have worked on projects in Unity. Bringing forth a positive attitude and the willingness and motivation to learn new programs. Technologically adept, offering experience with office technology programs and advanced computer skills. Ready to utilise my skills and passion to further the mission of a company
